

that they're laying the foundation of peace. In other words, the work we're doing today really will yield peace for a generation to come. And part of my discussion with them was I wanted them to think back to the work after World War II. After World War II, we defeated—after we defeated Germany and Japan, this country went about the business of helping these countries develop into democracies. Isn't it interesting a country would go to—have a bloody conflict with two nations, and then help democracy succeed. Why? Because our predecessors understood that forms of government help yield peace. In other words, it matters what happens in distant lands.

And so today, I can report to you that Japan is a strong ally of the United States. I've always found that very ironic that my dad, like many of your relatives, fought the Japanese as the sworn enemy, and today, one of the strongest allies in keeping the peace is the Prime Minister of Japan. Something happened between when old George H. W. Bush was a Navy fighter pilot and his boy is the President of the United States. Well, what happened was the form of government changed. Liberty can transform enemies into allies. The hard work done after World War II helped lay the foundation of peace.

How about after the Korean war? Some of you are Korean vets, I know. I bet it would have been hard for you to predict, if you can think back to the early fifties, to predict that an American President would say that we've got great relations with South Korea, great relations with Japan, that China is an emerging marketplace economy, and that the region is peaceful. This is a part of the world where we lost thousands of young American soldiers, and yet there's peace.

I believe that U.S. presence there has given people the time necessary to develop systems of government that make that part of the world a peaceful part of the world, to lay the foundation for peace. And that's the work our soldiers are doing in the Middle East today, and it's necessary work. It is necessary because what happens in the Middle East, for example, can affect the security of the United States of America. And it's hard work, and we've lost some fantastic young men and women, and we pray for their fami-

lies, and we honor their service and their sacrifice by completing the mission, by helping a generation of Americans grow up in a peaceful world.

I cannot tell you how honored I am to meet with the families of the fallen. They bear an unbelievable pain in their heart. And it's very important for me to make it clear to them that I believe the sacrifice is necessary to achieve the peace we all long for.

I thank you for supporting our troops. I thank you for setting such a fantastic example for a great group of men and women who have volunteered to serve our country, and thanks for being such fine Americans.

God bless.

NOTE: The President spoke at 10:23 a.m. In his remarks, he referred to Bob Sussan, commander, American Legion Post 177; Secretary of Defense Robert M. Gates; President Hamid Karzai of Afghanistan; Prime Minister Nuri al-Maliki of Iraq; Lt. Gen. David H. Petraeus, USA, commanding general, Multi-National Force—Iraq; Lt. Gen. Abboud Gambar, Iraqi commander of Baghdad, Iraqi Army; Haytham Kazim Abdallah Al-Shimari, head of the Rusafa Al Qaida-Iraq bomb network; and Prime Minister Shinzo Abe of Japan.

Memorandum on Assignment of Functions Relating to the Information Sharing Environment

April 10, 2007

Memorandum for the Director of National Intelligence

Subject: Assignment of Functions Relating to the Information Sharing Environment

By the authority vested in me as President by the Constitution and laws of the United States of America, including section 301 of title 3, United States Code, the functions of the President under section 1016(b) of the Intelligence Reform and Terrorism Prevention Act of 2004 (Public Law 108-458) (the "Act") are hereby assigned to the Director of National Intelligence (Director).

The Director shall perform such functions in a manner consistent with direction and guidance issued by the President, including (1) the Memorandum for the Heads of Executive Departments and Agencies of June 2, 2005, entitled "Strengthening Information

Sharing, Access, and Integration—Organizational, Management, and Policy Development Structures for Creating the Terrorism Information Sharing Environment,” and (2) the Memorandum for the Heads of Executive Departments and Agencies of December 16, 2005, entitled “Guidelines and Requirements in Support of the Information Sharing Environment,” provided that the Director shall ensure that the official within the Office of the Director of National Intelligence previously designated as the program manager responsible for information sharing across the Federal Government pursuant to the Act shall be the assistant to the Director in carrying out the functions delegated by this memorandum.

You are authorized and directed to publish this memorandum in the *Federal Register*.

George W. Bush

[Filed with the Office of the Federal Register, 8:45 a.m., April 12, 2007]

NOTE: This memorandum was published in the *Federal Register* on April 13.

Statement on Senate Passage of the “Stem Cell Research Enhancement Act of 2007” and the “Hope Offered through Principled and Ethical Stem Cell Research Act”

April 11, 2007

Scientists believe that stem cells have the potential for medical breakthroughs in treating debilitating medical diseases and disorders. However, the advancement of science and medicine need not conflict with the ethical imperative to protect every human life. I am a strong supporter of scientific research, which is why I authorized the first Federal funding for research on embryonic stem cells, under careful safeguards, starting in 2001.

My policy unleashed an unprecedented scientific effort using the stem cell lines my policy approved for funding. While encouraging—not banning—research, my policy also ensures that Federal funds are not used to create incentives to destroy or harm or create living human embryos for purposes of research.

The Senate today voted in support of legislation to overturn these safeguards. I believe this will encourage taxpayer money to be spent on the destruction or endangerment of living human embryos—raising serious moral concerns for millions of Americans.

Research using human embryonic stem cells is still at an early stage, and it will be years before researchers know how much promise lies in therapeutic applications. I believe this early stage is precisely when it is most important to develop ethically responsible techniques, so the potential of stem cells can be explored without violating human dignity and life.

S. 5 is very similar to legislation I vetoed last year. This bill crosses a moral line that I and many others find troubling. If it advances all the way through Congress to my desk, I will veto it.

Meanwhile, exciting and significant scientific advances have been reported over the past few years on uses of stem cells that do not involve the destruction of embryos. These advances using adult and other forms of stem cells are exciting. Some have even produced effective therapies and treatments for disease—all without the destruction of human life.

The second bill that passed the Senate today, the Hope Act, builds on this ethically appropriate research by encouraging further development of these alternative techniques for producing stem cells without embryo creation or destruction. I strongly support this bill, and I encourage the Congress to pass it and send it to me for my signature, so stem cell science can progress, without ethical and cultural conflict.

NOTE: The statement referred to S. 5 and S. 30.

Proclamation 8123—National D.A.R.E. Day, 2007

April 11, 2007

By the President of the United States of America

A Proclamation

Each year, Drug Abuse Resistance Education (D.A.R.E.) teaches millions of children across our country how to resist drugs
